

ADVISORY NOTICE RE CEREUS POKER NETWORK SECURITY ISSUE

May 7, 2010

The Commission has been advised of a security issue concerning the CEREUS poker network used by the Absolute Poker and Ultimate Bet poker sites. The issue concerns the mechanism used by CEREUS for network transmissions having a potential for player gaming data to be improperly accessed under certain specific circumstances.

The Commission is actively reviewing this matter with senior management of Absolute Poker and Ultimate Bet and with its Approved Agents. The Commission will issue a further notice of its findings as soon as this review is completed.

The Commission is monitoring immediate measures that are being taken to address the security issue and is advised that a more permanent solution is to be implemented on an urgent basis.

Based on information available at this time, it appears unlikely that player gaming data was actually compromised. However, this possibility will be reviewed further and, if necessary, the Commission will direct that the appropriate remedial actions be taken.

Until a solution to the security issue is fully implemented, the Commission recommends that players use caution when accessing the Absolute Poker or Ultimate Bet sites, in particular when using a public network (wired or wireless) or a private wireless network.
